SUMMARY

Bilingual Computer Science professional with strong problem-solving skills and a quick learning ability. Seeking an opportunity to apply my technical expertise in real-world projects. Proficient in multiple programming languages, algorithms, and database management. Adaptable, collaborative, and committed to staying up to date with emerging technologies.

EDUCATION

Lewis University

Bachelor of Science in Computer Science

GPA 3.88 | Magna Cum Laude

August 2022 - December 2024

Romeoville, Illinois

College of DuPage

Associate in Applied Science

GPA 3.85 | High Honors

January 2020 - December 2022

Glen Ellyn, Illinois

EXPERIENCE

DHS Immigration Technical Support Specialist

BI Incorporated (A GEO Group Company)

August 2022 - Present

Aurora, Illinois

- Troubleshoot and resolved complex hardware and software issues via phone and email, ensuring timely and accurate incident resolution.
- Processed alerts and ensured 100% compliance with contract requirements for electronic monitoring (EM) and GPS systems.
- Facilitated English-Spanish translations to ensure effective communication with diverse clients.
- Utilized software systems to log incidents, document resolutions, and track recurring technical issues.
- Handled sensitive customer data and case alerts with confidentiality and professionalism in a secure office environment.

Case Management Specialist

BI Incorporated (A GEO Group Company)

March 2022 - August 2022

Aurora, Illinois

- Managed monitoring accounts for parolees from the state of Illinois and Colorado, ensuring compliance with supervision conditions and reporting requirements.
- Acted as a liaison between parolees and law enforcement personnel, including agents, supervisors, and commanders, to coordinate communication and resolve issues.
- Worked under pressure in a high-volume, high-stakes environment while ensuring attention to detail and procedural compliance.
- Maintained detailed documentation of all interactions, incidents, and technical issues in accordance with policy and legal standards.

Amazon Fulfillment Center Warehouse Associate

Amazon

August 2021 - January 2022

Naperville, Illinois

- Fulfilled orders by locating merchandise, labeling inventory, and ensuring processing accuracy.
- Operated forklifts and PIT equipment at heights up to 35 feet while adhering to strict safety guidelines.
- Utilized scanners to read barcodes and adhered to loading and safety protocols.
- Consistently met daily quotas by following system prompts and adhering to efficient workflows.

PROJECTS

EcoCulture Full Stack Website | *React JS, JavaScript, MongoDB, Axios, Toastify, CSS, HTML*

- Developed an innovative online donation platform to foster sustainability and community engagement.
- Implemented a donation item management system enabling administrators to upload, edit, and manage items with photos and detailed information using JavaScript and MongoDB.
- Developed a secure user authentication system using MongoDB, JWT, JavaScript, and React, allowing users to create accounts and log in for personalized experiences.
- Designed an order management system allowing users to track donation orders and administrators to update order statuses using JavaScript and MongoDB.
- Developed a user-friendly website with responsive error notifications to alert users when input is invalid or when an issue occurs, enhancing the overall user experience.

AI-Powered Letter Generator | *Python, OpenAI, FPDF*

- Developed a Python object-oriented application that generated custom letters, allowing users to either type their own content or generate AI-assisted text using keywords.
- Implemented a graphical user interface (GUI) for intuitive and seamless user interaction.
- Integrated OpenAI's API to generate contextually relevant letter content tailored to the user's tone, topic, and intended audience.
- Generated print-ready PDF files using the FPDF library, enabling users to easily save and share their letters.

Connect 4 Game | *Java*

- Incorporated error handling to manage invalid moves and ensure a smooth gaming experience.
- Developed a robust object-oriented implementation of the classic Connect 4 game in Java.
- Implemented a user-friendly GUI, enabling players to interact with the game pieces seamlessly.
- Added visual effects to enhance the overall user experience.
- Conducted thorough testing and debugging to ensure the game's reliability and performance.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, JavaScript, PHP, Assembly

Web Development: React JS, HTML, CSS, Flask, Bootstrap

Database: SQL, Mongo DB

Operating Systems: Windows, Unix, Linux, MacOSX, iOS, Android

Libraries: Pandas, NumPy, Matplotlib, Axios, Toastify

Other Skills and Tools: GitHub, Visual Studio, PyCharm, IntelliJ, Eclipse, Agile Methodologies, Debugging and Troubleshooting

ADDITIONAL SKILLS

Soft Skills: Critical Thinking, Attention to Detail, Time Management, Problem-solving, Adaptability

Communication Skills: Verbal and Written Communication, Teamwork, Interpersonal Skills

Spoken Languages: English, Spanish
